PROFILE

Results-driven software developer with 3 years of hands-on experience in cutting-edge technologies, including Python, Java, SQL, and cloud platforms like Azure and AWS. Proven track record of creating efficient and innovative solutions. Actively seeking new development opportunities to contribute expertise in the latest technologies.

EDUCATION

Veermata Jijabai Technological Institue   Mumbai, MH
Bachelor of Technology   *Aug. 2017 – May 2021*

EXPERIENCE

Backend Developer   July 2021 – Present
Fiserv Inc   *Pune, MH*

- Spearheaded the development of a complex system comprising 200 unique reports, serving 500 clients from project inception.
- Collaborated on end-to-end Spring Boot applications, ensuring seamless integration with front-end interfaces for an intuitive user experience.
- Leveraged Python scripts to extract, transform, and load data from text reports, optimizing workflows and data accuracy.
- Designed and maintained individualized Python, SQL, and Power BI solutions for each report, tailoring them to specific client requirements.
- Executed SQL Data Definition Language (DDL) statements, creating structured tables in SQL Server for efficient data storage.
- Implemented Azure CI/CD pipelines, automating software deployment on Azure Red Hat OpenShift for streamlined and consistent releases.
- Enhanced Power BI reports, providing comprehensive visualization and insightful data analysis to support clients' decision-making processes.
- Contributed significantly to bug fixes and maintenance of JavaScript components within Spring Boot and React-based web applications.

CERTIFICATION

- AZ-900: Microsoft Azure Fundamentals   Obtained certification in Microsoft Azure Fundamentals, showcasing proficiency in fundamental cloud concepts and services.
- PL-300: Microsoft Power BI Data Analyst   Certified as a Microsoft Power BI Data Analyst, demonstrating expertise in creating impactful and insightful data visualizations for informed decision-making.

TECHNICAL SKILLS

Languages: Python, C++, SQL (Postgres), Snowflake, JavaScript, HTML/CSS, GoLang
Frameworks: Flask, Django, Springboot, Spring, React, Node.js
Developer Tools: Git, Docker, Azure, Openshift, AWS, VS Code, Visual Studio, PyCharm, IntelliJ, Eclipse
Libraries: pandas, NumPy, Matplotlib
